

FORUM ACUSTICUM EURONOISE 2025

Dear colleague,

Forum Acusticum Euronoise 2025 (FA25), the 11th EAA Annual European Conference on Acoustics and Noise Control Engineering organised by the Spanish Acoustical Society, will be held in **Malaga (Spain)**, from **June 23rd to 26th, 2025**.

Forum Acusticum is an annual international convention coordinated by a national acoustical society on behalf of the European Acoustics Association (EAA). The Congress will be a world leading event in the different areas of acoustics and a great opportunity for participants to meet in person, to expand their knowledge, and to share new techniques and competences, in the wide range of topics and interests that acoustics nowadays addresses both in our community, and for society.

As organizers of the Structured Session “**A15.6 - Acoustic and multidomain comfort in learning spaces**”, under the Main Theme “A15 - Room Acoustics”, we would like to cordially invite you to submit a paper as with your expertise in this field you would greatly contribute to this session.

Learning spaces should be designed appropriately to support the teacher-to-student communication process. From the acoustic point of view, this is particularly true in order to reduce teachers' vocal effort and to increase speech communication towards students of any grades and levels. Along with this domain, controlling the thermal, visual, and air quality domains also plays a key role as they all influence the global teaching-learning process.

Bringing together up-to-date researches, this session will be strongly multidisciplinary and will include both theoretical and experimental contributions. We expect to collect – but do not limit to – insights on the acoustic design of inclusive and effective learning spaces and on occupants' perceived comfort, performance, health, well-being in relation to environmental characteristics. Specifically, quality and comfort will be evaluated either with respect to the acoustic domain alone or in combination with the other domains of thermal, visual, and air quality.

Papers can be submitted for oral or poster presentation through the Forum Acusticum Euronoise 2025 website: <https://www.fa-euronoise2025.org>.

Submission deadline for abstracts not longer than 200 words is January 19th, 2025, while papers need to be submitted by *March 23rd, 2025*, in case of abstract acceptance.

Thank you in advance for your kind consideration, and if you have any questions do not hesitate to contact us. We look forward to seeing you in Malaga next June!

Sincerely,

Chiara Visentin
Giuseppina Emma Puglisi
